**Delivery of Sprint-3**

Date	09 November 2022
Team ID	PNT2022TMID36951
Project Name	Crude Oil Price Prediction

APPLICATION BUILDING

- **Creating HTML Files:**
  - ❖ Index.html (For Home Page)
  - ❖ Web.html (For Prediction Page)

- **Build Python Code:**
  - ❖ Upon creating the two HTML files and building the Python Flask code, the app is runon the local browser.
  - ❖ To run the app on the local browser the following code is used:

    - o set FLASK_APP=app.py

    - o set FLASK_ENV=development

    - o flask run

  - ❖ The local server address is copied and pasted on a browser

- **Run the app in local browser:**
  - ❖ The following outputs were obtained.

Home Page:

This is our home page where we get to know the summary of the project.

Prediction Page:

As this is is a time series approach, the user has to give past 10 days crude oil prices as input to predict the future crude oil price.
